

# EK solar module unit price

## Overview

---

Overview by technology of different price points in January 2026, including the changes over the previous month: Only tax-free prices for photovoltaic modules are shown. The prices stated reflect the average offer prices in retail and on the European spot market. Photovoltaic modules are the core components of solar power generation systems. They are made up of a certain number of photovoltaic cells connected in series and parallel through wires and packaged. Its main components include cells, photovoltaic glass, packaging film, backplane, aluminum frame. TOPCon 210\*210mm cells will be included from June 19,2024. 0%+ efficiency due to production line optimization and efficiency improvement from October 23,2024. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) - Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt.
