Overview

The company provides high-quality turnkey solar power plant solutions, designed, and engineered in America, and to end investors internationally. EA modules achieve higher yields per surface area, have lower BOS costs, reach higher power classes, and boast excellent efficiency. Solar photovoltaics (PV) is a very modular technology that can be manufactured in large plants, which creates economies of scale, but can also be deployed in very small quantities at a time. This allows for a wide range of applications, from small residential roof-top systems up to utility-scale. Task 1 has released a Fact Sheet on Trends in Photovoltaic Applications 2025. The IEA PVPS TCP regularly publishes assorted reports, articles, and recommended practices based on the research activities of the various tasks. Below, you can find resources and information on the. Globally, renewable power capacity is projected to increase almost 4 600 GW between 2025 and 2030 – double the deployment of the previous five years (2019-2024). Growth in utility-scale and distributed solar PV more than doubles, representing nearly 80% of worldwide renewable electricity capacity. EA solar modules meet the highest quality standards, are extremely reliable, and achieve outstanding energy yields. Energy America is one of the leading players in the development, design & engineering, financing, EPC, operation & maintenance, and asset management of solar power plants and.
