

# Ecuador s solar power supply system

## Overview

---

Ecuador's solar capacity hit 500 MW by 2024, led by projects like the 200 MW El Aromo Solar Plant. Aiming for 60% renewable energy by 2030 under its Energy Efficiency Plan, Ecuador harnesses its sun to complement hydropower. With abundant sunlight and increasing investments, understanding how Ecuador's solar energy system operates is crucial for stakeholders and enthusiasts alike. This. During a prolonged dry season in 2024, Ecuador's over-reliance on hydropower (78 percent of total generation) resulted in daily blackouts of up to 14 hours, hurting economic activity. In 2024. The Ecuador Solar Energy Market Report is Segmented by Technology (Solar Photovoltaic and Concentrated Solar Power), Grid Type (On-Grid and Off-Grid), and End-User (Utility-Scale, Commercial and Industrial, and Residential). The coastal plains and inter-Andean valleys, like those near Guayaquil and Quito, capture steady sunlight, though the Amazon sees more clouds. As of 2021, the country generated a substantial 79% of its electricity from hydropower, owing to its mountainous terrain. Sunpal Power is proud to present a significant project in Ecuador: a 1MW hybrid grid solar system designed to address local power shortages. This innovative energy solution aims to supply reliable electricity to cities and villages, meeting the pressing power demands of the region.
