

Electricity regulations northern cyprus

Overview

Northern Cyprus does not have a unified, codified Energy Law like many countries, but energy governance operates under several laws and regulations, mainly focusing on electricity, renewable energy, and fuel supply: Electricity Law (No. 37/2013). The Electricity Authority of Cyprus was established under the Electricity Development Law Cap. 171 of 1952, in order to exercise and perform functions relating to the generation and supply of electric energy in Cyprus, operating within its own legal framework. Under this law EAC has the authority to. Here's an overview of Energy Law in Northern Cyprus —keeping in mind that Northern Cyprus (officially the Turkish Republic of Northern Cyprus, TRNC) is a self-declared state recognized only by Turkey, which affects its legal and international standing. within the “physical” constraints imposed by the network. Nowadays, Cyprus boasts approximately 407MW of photovoltaic systems, 157MW of wind systems, and 13MW of biomass systems in operation, namely a total. The relevant legislation in Cyprus in the RES sector is: The Promotion and Encouragement of the Use of Renewable Energy Sources Law of 2022, L.
