## Overview

---

Renewable energy (also called green energy) is made from that are replenished on a . The most widely used renewable energy types are,, and . and are also significant in some countries. Renewable energy installations can be large or small and are suited for both urban and rural areas. Renewable energy is oft.

## Electricity renewable sources

---

### What is renewable energy? , United Nations

Renewable energy is energy derived from natural sources that are replenished at a higher rate than they are consumed. Sunlight and wind, for example, are such sources that are constantly
