## ESS

## Overview

---

Malta's utility-scale, long-duration energy storage system uses steam-based heat pump technology to deliver dispatchable, cost-effective energy. Hear directly from the voices working alongside us to advance reliable. Addressing the intermittency of renewable sources, Malta is investing in energy storage solutions and grid modernization. The announcement late last year of a \$26 million, Series A funding round for new start-up Malta Inc. 13 years in power gen CSP construction, maint. HydroGenEration, or HGE in short, is looking at floating offshore wind power as a means of supplying electrical power to an offshore hydrogen production and hydrogen storage facility for central Mediterranean waters, while still being close enough to the hydrogen fuel end-users.
