

# Energy storage investment trends vietnam

## Overview

---

Growing manufacturing investments, expanding urban populations, and higher household consumption are placing pressure on the country's power-generation structure and grid flexibility, creating clear demand for energy storage solutions. Vietnam's battery energy storage market is gaining momentum, driven by a combination of rising electricity demand, increasing renewable energy penetration, regional supply-demand imbalances, and supportive government policies. According to InfoLink, emerging markets outside China, the U., and Europe in global newly installed energy storage capacity is expected to rise significantly from about 7% in 2024 to around 18% by 2026. Across Southeast Asia, countries such as Indonesia, Malaysia. One of the key highlights of Vietnam's revised Power Development Plan VIII (PDP8) is the significant increase in the targets for Battery Energy Storage Systems (BESS). The original PDP8 approved in 2023 had set out a target of 300MW of BESS capacity by 2030. The revised PDP 8 (approved by the Prime. - As Vietnam accelerates its energy transition and positions energy storage as critical infrastructure under its PDP8 roadmap, unlocking effective financing and investment mechanisms has become a key challenge.

## Energy storage investment trends vietnam

---

### Vietnam Energy Storage System Market Size and Forecasts 2030

Vietnam Energy Storage System Market is driven by increasing renewable energy adoption, declining battery costs, and advancements in storage technologies.
