

Energy storage power station opens gwhEK

Overview

Plans were announced to transform the site of the old Arthur Kill Power Station on Staten Island into the city's largest battery storage facility. When complete, the 60-megawatt-hour installation will be able to power over 10,000 households during times of peak electricity demand. Integrating storage in the electric grid, especially in areas with high energy demand, will. Instead, they plan to build energy storage units — essentially large-scale rechargeable batteries — that will store energy generated by solar panels and wind turbines until it's needed. Photo by Susan De Vries One of New York City's most prolific power generating. A former power plant in New York City is getting a new lease on life, and that's great news for both local residents and the planet, according to Electrek. Last week, New York State Public Service Commission approved an application for a Certificate of Public Convenience and Necessity, filed.
