

# Environmental sustainability bamako

## Overview

---

With the growing concern for the environment and the urgent need for sustainable development, Bamako has seen various green initiatives take root. The Malian government has announced a significant 31.5 billion CFA francs (approximately \$51 million) funding boost for the Bamako Urban Resilience Project (PRUB), a strategic initiative to address the capital city's growing environmental and infrastructural challenges. This guide explores the multitude of efforts aimed at fostering a greener, more sustainable city. The Malian government has recognized the importance of. UNDP-supported project financed by the GEF-LDCF aims to ensure the long-term sustainability of vulnerable productive areas in the regions of the Centre, through nature-based solutions and peaceful management of natural resources Restoring productivity in vulnerable grazing, farming, and fishing. Bamako participates in GEF-8 SCIP through the GPSC, advancing integrated urban development and circular waste management to reduce flooding and health risks. The program emphasizes integrated land-use planning, nature-based solutions, decarbonized infrastructure, and circular economy approaches. Are you searching for Environmental sustainability Conferences in Bamako 2026?

You have subscribed to International Conference alerts that provide you with latest updates of the forthcoming Environmental sustainability conferences in Bamako focusing on for 2026 and also details of important events. Bamako is the 6th fastest growing city in the work. But it is unable to keep up with the needs of its citizens and manage growing climate change risk. Access to public urban services is low. Lack of institutional development on land regulation and markets has led to largely uncoordinated pattern of.
