

# Estonia s battery energy storage solution

## Overview

---

The Hertz 1 battery energy storage facility, a 100 MW/200 MWh project in Kiisa, Estonia, is now operational. As one of the largest in the Baltics, it marks the first phase of the Baltic Storage Platform designed to stabilize the grid following synchronization with Europe. The 100 MW/200 MWh battery energy storage project in Kiisa began operation on February 3 as scheduled – just two weeks after a testing fault at the facility caused the most significant disturbance to the regional power grid since Estonia's desynchronization from the Russian electricity system. This news is reported by ESS News.
