

# External coating options for energy storage containers

## Overview

---

Axalta offers a diverse range of dielectric coatings to ensure battery safety and performance, including options like thermosetting powder coating, electrocoat, thermoplastic powder coating and UV coatings. These coatings provide superior insulation and protection, enhancing battery. From robust Powder Coating for housings to advanced Liquid Coating and E-Coating for internal structural components, Axalta's innovative products redefine durability and performance, ensuring a sustainable and efficient future for energy storage technology. We also help make your production more efficient and keep your costs down. Together with. Energy storage coatings are specialized coatings designed to enhance the energy storage capabilities of various devices. By exploring eco-friendly container coatings, customers can extend the life of their storage units while reducing their. What are the primary factors driving adoption of water-based fire retardant coatings in energy storage systems?

The shift toward water-based fire retardant coatings in energy storage systems is driven by escalating safety regulations, environmental mandates, and performance demands in battery.

## External coating options for energy storage containers

### Energy Storage Industry: Cracking the Coating Code for Safety and

This article explores how electrostatic coating technology solves the safety, compliance, and cost challenges of energy storage casings from a global industry perspective, becoming the

**12.8V6AH**

Nominal voltage (V):12.8  
 Nominal capacity (ah):6  
 Rated energy (WH):76.8  
 Maximum charging voltage (V):14.6  
 Maximum charging current (a):6  
 Floating charge voltage (V):13.6~13.8  
 Maximum continuous discharge current (a):10  
 Maximum peak discharge current @10 seconds (a):20  
 Maximum load power (W):100  
 Discharge cut-off voltage (V):10.8  
 Charging temperature (°C):-20~+50  
 Discharge temperature (°C):-20~+60  
 Working humidity: <95% R.H (non condensing)  
 Number of cycles (25 °C, 0.5c, 100%doD): >2000  
 Cell combination mode: 32700-4s1p  
 Terminal specification: T2 (6.3mm)  
 Protection grade: IP65  
 Overall dimension (mm):50\*70\*107mm  
 Reference weight (kg):0.7  
 Certification: un38.3/msds
