

# Factory price battery storage in nigeria

## Overview

---

The cost of a solar battery in Nigeria ranges from ₦100,000 to ₦15,000,000. This price is not fixed since it is determined by the capacity of the battery and brand. Powercell Limited specializes in innovative solar energy solutions and alternative power supply systems, offering a range of products that include deep-cycle batteries and Uninterruptible Power Supply (UPS) systems. For instance, solar batteries that contain lithium are always costlier than those containing lead. Lithium-ion batteries last longer and are more durable. As a battery energy storage system company with over 15 years of experience, GSL ENERGY has successfully delivered a wide range of energy storage solutions in Nigeria.
