

Fiji double-glass solar module specifications

Overview

Available in range a transparencies, opaque to 80% light transmission. Standard panel dimension 1200mm x 600mm x 7. Full range of colour laminates or coatings available on request. Efficiency from 12% or 118Wp/m². This product catalogue is divided into two major parts each providing specifications for the solar home systems and the other for solar lanterns. A tropical cyclone places immense physical stress. comparing with conventional P-type module. N-type solar cell has no LID naturally which can increase power generation. Adpoted SunEvo lastest S-TOPCo 2. 0 technology, No polysilicon wrap around, Full electrical isolation, Zero leakage current; Much Safer for roof. Protection against harsh environmental conditions certified by TÜV Rheinland.

Fiji double-glass solar module specifications

DAS-Solar-D-Matrix

Excellent product appearance and performance Two-sided double-glazed modules, symmetrical structural design, low risk of hidden cracks.
