

# Flare Photovoltaic Panels

## Overview

---

Sunflare's thin, lightweight flexible solar panels are easy to install. Requires no racking, and no heavy ballasts. Sunflare Copyright © 2021 All rights reserved. At our company, we are committed to environmental sustainability and responsible solar photovoltaic system waste management. Our team carefully dismantles damaged panels and separates the components for recycling, reducing the amount of waste that ends up in landfills and promoting environmentally. Every Sunflare panel is made of our SUN2 cell starting with high-quality stainless steel, then layered with semiconductor materials only a few micrometers thick. Faster, easier installation - just peel and stick. Installation of Flex60 on steeper curves or slopes. Northern lights occur when a solar flare interacts with Earth's atmosphere.

## Flare Photovoltaic Panels

---

### Flex -- Sunflare Array

Sunflare modules are the best solar panel in partial shade. Sunflare modules have bypass diodes for each individual cell. This means when a cell is shaded, only that individual cell stops producing power. Traditional ...

## Resources , Sunflare

This video shows how fast Sunflare Flex60 panels can be installed. Sunflare panels have adhesive preinstalled on the back of the Flex60 solar panel--just peel and stick to TPO, or EPDM membrane roof.
