

# French portable energy storage project

## Overview

---

TAGENERGY, a global leader in low-carbon energy solutions, launches construction of France's largest battery energy storage platform (France, Marne). This landmark project marks the start of an ambitious expansion plan for 2025, with accelerated solar and storage development. The 100 MW/200 MWh battery energy storage system (BESS) is connected to the grid with a charge and discharge voltage of 63 kV. It is expected to be fully operational by the end of 2025. TESLA, a. The Cheviré project is located on the former site of a coal, gas and oil-fired plant, transforming it into a renewable energy center. The €250 million (C\$371M/US\$264M) 240MW/480MWh BESS project is a milestone for France, boasting a capacity.
