

# Germany's solar energy storage policy plan

## Overview

---

On 8 December 2023, the Federal Ministry for Economic Affairs and Climate Action (BMWK) presented its energy storage strategy. The strategy paper provides an overview of the measures and challenges involved in establishing energy storage systems. Electricity storage has an important role to play in this, both for energy storage as such and also for the stabilisation of the electricity system and the grids. There is no legal jargon to decipher, and no scrolling through endless PDFs that you come back to five times to read the. Germany is preparing to ease planning rules for battery, heat, and hydrogen storage systems built outside urban zones. The aim of the strategy is to contribute to a “virtually climate-neutral” electricity supply in 2035.
