

# Gobi Desert Solar Power Generation Installation

## Overview

---

This massive solar installation has an installed capacity of 3 gigawatts (GW) and consists of over 5. The plant is expected to generate approximately 5.7 billion kilowatt-hours of electricity annually, which is enough to power 2 million households. China has just turned on a world-first solar thermal power plant in the Gobi Desert, a move that could change the way solar energy is produced. This new plant is designed to be cheaper and more efficient than traditional solar thermal power stations, making it a major step forward for renewable. China recently unveiled its largest single-capacity solar farm, the Mengxi Blue Ocean Photovoltaic Power Station, in the Gobi Desert.

## Gobi Desert Solar Power Generation Installation
