

# Grenada outdoor telecom cabinet

## Overview

---

This enclosure features a built-in air conditioning system with a cooling capacity of up to 6500W for optimal temperature control. Though gray is commonly available, you can request custom. Although the most rugged types of telecom equipment can operate without heating and cooling, most outdoor telecom cabinets are designed to comply with the GR-3108-CORE Class 1 specification, which requires that the internal temperature of the cabinet is maintained between 41°F (5°C) and 104°F. When your network infrastructure demands reliable outdoor protection, American Products delivers weatherproof telecom enclosures engineered for performance and built to last. Temperature management is crucial. Keep outdoor telecom equipment within the optimal range of -40°C to +55°C to prevent overheating. AZE Telecom offers top-quality weatherproof outdoor electrical enclosures and telecom cabinets. Designed to protect your equipment from rain, dust, and extreme temperatures, our waterproof and customizable solutions ensure reliability in any environment.
