

# Guotou New Energy Storage

## Overview

---

The Hami Guotou Shichengzi 100MW/400MWh Vanadium Flow Battery (VFB) Independent Energy Storage Project, the first “vanadium flow” independent storage power station in Hami, has officially transitioned into commercial operation, strengthening regional power security and supporting. The Hami Guotou Shichengzi 100MW/400MWh Vanadium Flow Battery (VFB) Independent Energy Storage Project, the first “vanadium flow” independent storage power station in Hami, has officially transitioned into commercial operation, strengthening regional power security and supporting. Source: VRFB WeChat, 8 January 2026 The Hami Guotou Shichengzi 100MW/400MWh Vanadium Flow Battery (VFB) Independent Energy Storage Project, the first “vanadium flow” independent storage power station in Hami, has officially transitioned into commercial operation, strengthening regional power. An energy storage station plays a key role in building new-type power systems and supporting realization of China's “dual carbon” goals of peaking carbon dioxide before 2030 and reaching carbon neutrality before 2060. Where is the largest energy storage station in China?

The Baotang. On the afternoon of April 15, Luneng Group Qinghai Branch, Guodian Longyuan Qinghai Branch, and Guotou New Energy Investment Co. (Rongke Power) has successfully won the bid, in partnership with China Power Construction Group Northwest Survey and Design Institute Co., for the 100MW/400MWh vanadium flow battery energy storage project in Hami Guotou. Energy storage is expected to play a significant role in enabling the global data centre build-out, although the commercial and financing models developers will use are evolving, Energy-Storage. Guotou Securities: The proportion of installed capacity of new energy surpasses that of thermal power.
