

Have the photovoltaic panels been stolen

Overview

While solar theft isn't widespread, it does happen, particularly in remote areas and off-grid installations. However, there are several ways to prevent theft and protect your. According to Spotter Global, theft from solar farms was expected to rise throughout 2024, with growing demand for panels making them both easier to sell and more valuable to steal. This certainly seemed to be the case, as between January and August 2024, there were at least 70 reported offences. The consequences of solar panel theft and vandalism can be severe, both financially and environmentally. The financial impact of these thefts are substantial. Department of Energy reports that approximately \$1 billion worth of copper is stolen annually from various locations, including. A significant theft has disrupted the renewable energy sector in Manzanillo, Granma, where local authorities reported that 38 photovoltaic panels and 20 steel beams were stolen from a solar park. In June this year, a farmer who had £70 000 worth of high-tech equipment stolen believes a gang spied on his premises with a drone. Given that solar panels are valuable and relatively easy to remove, they can be a target for thieves.
