

Homemade photovoltaic panel steering bracket

Overview

This DIY guide explains everything you need to know to build stand-alone photovoltaic systems that can power almost anything you want. It includes a 3 part series and a complete 20-minute video showing how to do it. This bracket does not 'follow-the-sun' and is fixed to set angles. Cutting costs is a priority for many solar enthusiasts, and building a DIY solar panel mount is a savvy way to install your panels on a budget. By making your own mounting system, you can save on hardware that typically makes up around 10% of a solar project's cost. more Audio tracks for some languages were automatically generated. You can make it in minutes using PVC pipe and joints. Adding to this, it's super lightweight and foldable making it perfect for portable setups.
