Adding a lightning protection system to a health care facility such as a hospital, doctors office, health clinic or urgent care center helps to provide peace of mind and allows staff to focus on maintaining the health and wellness of patients without the possibility of interruption caused by. Installing lightning protection systems contributes to community resilience by helping to assure hospitals remain functional during times of crisis when they are needed the most. What Is Lightning Protection?

Building Types Lightning is a hazard to all types of structures. In fact, some of the world's tallest structures such as the Willis (Sears) Tower, 875 N. (John Hancock) and the Aon Center (Amoco Oil) in Chicago are protected with Harger. An effective and complete surge and lightning protection concept protects the power supply and information technology against transient overvoltages, such as those caused by lightning strikes or switching operations. This is a vital, especially in the case of sensitive, networked technology. 27 billion in insurance claims. This shows how important it is to protect healthcare places from lightning damage. In short, getting strong. Hospitals operate perpetual motion machines with 24-hour uninterruptible service to save people's live and perform urgent medical treatments.
