

Households can install solar power generation

Overview

Homeowners can run their homes using solar power instead of taking energy from the grid, which lowers energy bills and carbon footprints. A home solar energy system costs between \$18,000 and \$20,000 before any incentives and typically saves homeowners around \$1,500 annually. Solar projects are making it easier for Americans to choose solar energy to power their homes. Dramatic Cost. Sunlight can power everything in your home or business, from lights and appliances to heavy equipment and electric vehicles.
