

How big a solar panel should I use for an 800w all-in-one solar panel machine

Overview

"An 800W panel typically measures 2.1m – about 25% larger than a standard 400W residential panel, but delivers double the power output. " When a logistics company in Texas replaced their 400W panels with 800W photovoltaic modules. The 800-watt solar power system is one of the best solutions to utilize solar power in running some devices during the day and night. However, many questions might come to your mind when building your system. To size your solar panel, you need to know your daily energy consumption (in watt-hours). Is 800w of solar enough for full time vanlife?

You have to do the math - and be honest with your worst-case numbers. The following is a full guide to calculate battery storage and solar needs.

How big a solar panel should I use for an 800w all-in-one solar panel

800 Watt Solar System (Full Guide, Sizing, Calculator)

An 800w solar system could have a 1000w solar inverter and two 24v batteries of 200Ah capacity. This estimation is based on 5 peak sun hours, but this could vary widely depending on ...
