

# How many billions of dollars are invested in solar battery cabinet factories

## Overview

---

In just the past three years, more than 380 clean energy manufacturing projects have been announced nationwide, and investment has surged from about \$2. That picture is starting to change. is rapidly building its own battery supply. Battery and solar factories are driving the build-out of domestic cleantech manufacturing in the United States following the passage of the 2022 Inflation Reduction Act, a new report by Bloomberg NEF and the Business Council for Sustainable Energy shows. Together, these companies promise to deliver an annual capacity of close to 1,200 gigawatt-hours before 2030, if each factory reaches. Quarterly investment in clean manufacturing more than tripled—from \$2. 0 billion in Q1 2025—primarily driven by the electric vehicle supply chain.
