

How many years can solar power generation be subsidized

Overview

In summary, government subsidies for solar power generation take various forms and can last anywhere from 5 to 30 years, depending on national policies and the technological landscape. If you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy tax credit. The Residential Clean Energy Credit equals 30% of the costs of new, qualified clean energy property for your. The 2022 Inflation Reduction Act (IRA) had promised generous, decade-long tax credits for clean energy (including a 30% credit for home solar installations). However, a mid-2025 budget law - officially the One Big Beautiful Bill Act (OBBBA) - rolled back many of these incentives much sooner. In. The most common solar tax incentive is called the Investment Tax Credit (ITC). The ITC — also known as the Federal Solar Tax Credit — is a popular tax rebate program offered by the US Federal Government for homeowners looking to switch to clean, renewable solar power. The duration of subsidies can typically extend over a span of 5 to 30 years, with variations determined by legislative frameworks. Switch to solar with a system built for you. Join over 8,000 people who received a free, no obligation quote in the last 30 days.
