

How much does a 10-kilowatt flexible solar panel cost

Sample Order
UL/KC/CB/UN38.3/UL

Overview

On average, a 10 kW solar panel system costs \$25,400, according to real-world quotes on the EnergySage Marketplace from 2025 data. But your actual price will depend on factors like your roof's complexity, local labor costs, the equipment you choose, and what incentives are available in your area. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. On average, a 10kW solar system will produce about 30 to 50 kilowatt-hours (kWh) per day. That is about 1,000 to 1,500 kWh per month, or about 12,000 to 18,000 kWh per year. Here's what affects the production: Location: In sunny states like Arizona or California, your system will produce more power. A 10kW solar power system usually covers 55 to 70 square meters and can generate up to 16,700 kWh of electricity annually. 10 per watt with the latest, most powerful solar panels, module optimizers, or micro-inverters. For home or business, save money on monthly power bills. Click on a solar kit below to review parts list and options for battery storage, EV. In general, these costs can represent a significant portion of the total outlay, often ranging from \$5,000 to \$10,000 for a 10KW system. The cost structure varies based on preferred installer, geographical location, and local regulations.
