

# How much does a 200kWh solar container battery cost

## Overview

---

As of early 2025, the average cost to install a home solar battery in the U.S. ranges between \$9,000 and \$18,000 before incentives. The Growatt APX 200kWh battery system is meticulously engineered to meet the substantial energy needs of industrial and commercial enterprises. As the most robust model in Growatt's acclaimed APX series, this system offers an unrivaled energy storage capacity, ensuring reliable and continuous power. Battery capacity (kWh): Larger batteries store more energy and cost more overall, but often have a lower cost per kilowatt-hour. Battery chemistry: Lithium Iron Phosphate (LFP) and Nickel Manganese Cobalt (NMC) are the most common chemistries, each with different price and performance points. Battery Quantity in Parallel: 5 (in a BMS system) Cycle Life:  $\approx$ 6000 Times. We will ship it when it comes in stock. The StackRack SRBOX-200 is an outdoor-rated.
