

# How much does a wind power generation set cost

## Overview

---

The average cost to install a home wind turbine is \$35,000, with prices ranging from \$500 to \$80,000. 6-4 million each provide the most attractive financial returns with 5-10 year payback periods and capacity factors of 25-45%, significantly outperforming residential systems. Hidden Costs Are Substantial: The turbine itself. The 13th annual Cost of Wind Energy Review uses representative utility-scale and distributed wind energy projects to estimate the levelized cost of energy (LCOE) for land-based and offshore wind power plants in the United States. 2 million per MW of installed nameplate capacity. How much do commercial wind turbines cost will vary significantly. For homeowners, businesses, utilities and governments assessing the economic viability of wind energy, the pivotal question arises – how much does the average wind turbine truly cost?

This guide provides an in-depth breakdown of wind turbine pricing based on size, technology, location, and other. While renewable energy is no longer a “new” idea and large, green energy wind farms are more common – and more efficient – the combination of technology, construction, and operating expenses mean that a wind turbine's initial cost is very expensive. And calculating the “simple” cost of a wind.
