

How much is an industrial photovoltaic panel per square meter

Overview

The solar panel cost per square meter, including all labor and system components, is approximately \$6,000. Nationwide average prices for industrial solar panels are predicted to range between \$1.56 per watt in 2021 by the SEIA (Solar Energy Industries Association) and the National Renewable Energy Laboratory (NREL). Unlike residential panels, commercial systems tend to be larger, with capacities ranging from tens of kilowatts (kW) to several megawatts (MW). Let's use a polycrystalline panel as an example.
