

How to connect the purlins of photovoltaic bracket

Overview

After the greenhouse frame is erected, slide the the Purlin Brackets over the hoop, with one on each side of the ridge pole. Repeat the same for the other side. Bolted connections are one of the most common methods for joining C-Purlins. Here are the steps for making a bolted connection: Prepare the C-Purlins: Ensure that the ends of the C-Purlins are clean and free from any debris. ctive pedestal for L-Foot attachment of rail-mounted solar PV. This specification can be found on the. In the intelligent photovoltaic tracker brackets, cold-formed purlins were used to support the photovoltaic panels, and located spannig the horizontal single-axis and the module frame. It's like buying a Ferrari but using bicycle tires. Thereby we have to introduce some solar panel support with Z profiles and purlins brackets,which are hot galvanized steel materialfor use in long time with better surface and the bes l role in photovoltaic installations.
