

How to judge whether photovoltaic panels are dirty

Overview

Studies have shown that dirty solar panels can lose anywhere from 10% to 25% of their energy output. Efficiency: Dirt, dust, bird droppings, and other debris can obstruct sunlight and reduce the panels'. How to tell if the solar panel is dirty?

To determine whether a solar panel is dirty, one must observe several indicators and perform specific assessments. Regular maintenance takes just an hour and requires minimal equipment, making it one of the most cost-effective ways to maximize your solar investment.

How to judge whether photovoltaic panels are dirty

CLEAN vs DIRTY

Studies have shown that dirty solar panels can lose anywhere from 10% to 25% of their energy output. In areas with high dust or pollen, this loss can be even more significant. Efficiency: Dirt, dust, bird ...
