

# How to measure the best angle of photovoltaic panels

✓ 100KW/174KWh

✓ Parallel up-to 3sets

✓ IP Grade 54

✓ EMS AND BMS

## Overview

---

As a general rule of thumb, the ideal solar panel angle will match your home's latitude, usually around 30°- 45° and facing south in the US. A correctly tilted system can improve efficiency by 5-10% annually, reducing payback time and boosting long-term savings. In this guide, we'll break down. Historically, the advice for finding the best angle for solar panels has been to set your tilt angle equal to your latitude. Using latitude is a good rule of thumb. Think of it as how much the panel leans backward or forward to face the sky.
