

# How to report a stolen solar inverter

## Lithium Solar Generator: \$150

## Overview

---

If you suspect someone is tampering with or receiving unauthorized energy service, let us know. Your call or message can be anonymous and will remain confidential. Report Theft Online. Immediate Response: If solar energy is stolen, the following actions are essential: 1. Confirm the theft by verifying power production data. Notify your solar. The objective is not simply to replace stolen material, but to restore operational control, protect revenue and reduce the likelihood of repeated exposure. Establish control and verify impact immediately. The first step after a theft is not ordering replacement material, but confirming what was. According to a study by the National Renewable Energy Laboratory (NREL), the average cost of replacing a stolen or damaged solar panel can range from \$500 to \$1,000 per panel, depending on the size and type of system. ©1996- 2026 American Electric Power Company, Inc.
