

Huawei Liquid Cooling Energy Storage Supercharging All-in-One

Overview

New Huawei Supercharger for EVs has the highest power of 1.5 megawatt and can reload 20kWh of electricity per minute. It is the industry's first completely liquid-cooled charging solution that aims to deliver faster and power-efficient services. The power sharing matrix saves grid capacity, and the charging efficiency is increased to. Huawei fully Liquid-cooled power unit is a product oriented to electric vehicles for efficient energy conversion and power allocation.

Huawei Liquid Cooling Energy Storage Supercharging All-in-One

One Kilometer Per Second, Huawei's Liquid-Cooled Ultra-Fast ...

The emergence of Huawei's 600kW Liquid-Cooled Ultra-Fast Charging pile is bound to accelerate the technology development and wide application of high-power liquid-cooled charging ...
