

# Huawei Microgrid Solution

## Overview

---

Huawei has developed the world's largest microgrid power station which delivers 1 billion kWh power supply per year. The new solution will play a significant role in Saudi Arabia's Red Sea project and provide several green electricity benefits. Provides professional and detailed design schemes, compares different capacity schemes, and produces a design report in minutes. Offers all-scenario delivery capabilities including digital and RT-LAB hardware-in-the-loop electromechanical and electromagnetic transient simulations to verify. Huawei's FusionSolar Smart String Energy Storage Solution will power the Red Sea City's off-grid, clean energy needs. An advertisement in the NEOM region in Tabuk, Saudi Arabia. 5% with linear loads in off-grid mode.

## Huawei unveils world's largest microgrid, featuring 1.3 GWh of battery

Covering 100 km of grid infrastructure, it is the world's first independent microgrid

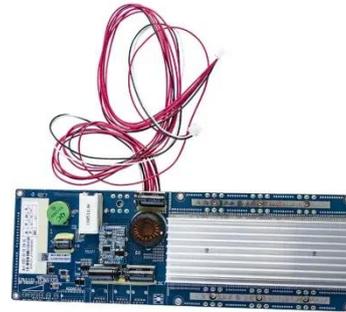

project to be fully powered by solar and energy storage without connection to any power network.
