

Is anyone buying solar panels

Overview

This comprehensive guide examines the best places to buy solar panels based on extensive testing of multiple purchasing channels, real-world shipping experiences, and analysis of pricing, quality, and customer service across different retailers. The final price to install solar panels on a rooftop might differ by \$50,000 from one house to another. But some costs are common to almost every installation. As you sketch out your dream system and think about your budget, our aim is to give you the knowledge to ask potential installers detailed. With current tax credits and incentives, the average payback period for solar panels is between six and 10 years. Join over 8,000 people who received a free, no obligation quote in the last 30 days. The cons include high initial costs, specific roof requirements, possible higher property. Solar panels are worth it for most homeowners, as long-term savings and increases in property value make up for the high initial installation costs.
