

# Is it safe to add photovoltaic panels to charging piles

## Overview

---

Summary: Photovoltaic (PV) panels are a safe and reliable way to harness solar energy, but their safety depends on proper installation, quality components, and regular maintenance. To install solar charging piles in high-rise buildings, several critical steps must be taken to ensure efficiency and effectiveness. To achieve net-zero goals and accelerate the global energy transition, the International Energy Agency (IEA) stated that countries need to triple renewable energy capacity from that of 2022 by 2030, with the development of solar photovoltaics (PV) playing a crucial role.
