

# Is the cost of solar power generation in the community high

## Overview

---

The cost of solar power has plummeted as of 2023 and the years preceding it. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U. solar photovoltaic (PV) systems to develop cost benchmarks. <sup>1</sup> Thanks to generous tax credits and subsidies, solar installations are now increasing worldwide. Below, we cover some of the economic. Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2026, with the national average at \$19,873 before incentives. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. Solar power is a popular form of clean energy that can help reduce carbon emissions and electricity costs for households and businesses. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) - Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt. Global estimates are used before 2010; European market.
