

Is the roof damp after photovoltaic panels are installed

Overview

In virtually all cases, the answer is no. Roof leaks after solar panels are extremely rare. Left unchecked, it can spiral into thousands of dollars in repairs, mold growth, and even structural damage. Almost always, homeowners will notice the leak. Installing solar panels can be a great way to harness renewable energy, but some homeowners worry about potential roof leaks after the installation. Understanding the common causes of these leaks, how to identify them, and how to prevent them can help you enjoy the benefits of solar energy without. However, one concern that often arises is whether installing solar panels, or, if existing solar panels can cause roof leaks. However, this is only true when installation is done by professionals.
