

Is there a solar glass factory in Tampere Finland

Overview

There is no primary float glass production for solar in the country; the high-energy intensity and capital requirements for a float glass line dedicated to low-iron solar glass have precluded such investment to date. Tampere is the third largest city in Finland and is located in the southwest of the country. Some of the most famous sights include the Cathedral, Tampere Art Museum, Vapriikki. Global Glass Specialists is a Finnish company that specializes in consulting and training for the glass processing industry, offering solutions in areas like tempering and lamination. Finnglass Oy specializes in innovative glass products, particularly heatable glass designed to prevent condensation. In the heart of Finland, Tampere is embracing a green revolution. Throughout his career, Jukka has developed the glass manufacturing technologies further at Pilkington, Glassrobots and Taifin Glass Machinery. ABB: PV string inverters, PV central inverters, Inverters stations, Low voltage products for PV, Compact Secondary Substations, Transformers, Substations, SCADA for PV-systems. The company also supports the development of new technologies integrating intelligence to glass.
