

Is there leakage under the photovoltaic panel

Overview

Signs of a roof leak under solar panels include water stains, damp odors, water pooling, and decreased energy production. To fix a roof leak, identify the source, repair the roof, inspect and upgrade the mounting system, and reinstall and seal the solar panels properly. After all, your solar installation was meant to enhance your home's efficiency, not compromise its integrity. But don't worry—you're not alone, and this issue is more common than you might think. Discovering a roof leak after a new solar panel installation introduces immediate concerns about property damage and questions. Although solar panels provide clean energy, they can sometimes hide roof leaks that go unnoticed until damage worsens.
