

Italian Modular Battery Cabinet

Overview

The battery cabinet adopts a modular design and can be flexibly expanded; it is compatible with 320Ah large battery cell design and has higher energy density, and a single cabinet can be expanded to 393kWh; safety designs such as water and electricity separation. The battery cabinet adopts a modular design and can be flexibly expanded; it is compatible with 320Ah large battery cell design and has higher energy density, and a single cabinet can be expanded to 393kWh; safety designs such as water and electricity separation. The cabinets covered by the technical specification have been designed to contain the hermetic lead-acid electric accumulator batteries. The construction characteristics of the recombination type lead-acid electric accumulators (valve-regulated hermetic accumulators); the absence of acid fumes and. Our battery cabinets are sophisticated and offer modular solutions that can withstand even temperatures and earthquakes when it matters. VENTILATION: Our cabinets are specially designed for the use of stationary batteries. Supports up to 28 battery modules with hot-swap design and scalable configuration. Whether for utility-scale projects, industrial applications, or.

Italian Modular Battery Cabinet

BATTERY CABINETS CATALOGUE

The monoblocks making up the battery are made of flame retardant material according to UL 94 class HB or V0 standards, this type of construction makes them particularly suitable for installation in ...
