

Jamaica electric vehicle infrastructure

Overview

The main objectives of the roadmap are the development of an enabling regulatory environment, the deployment of an efficient charging infrastructure, the definition of standards and battery guidelines, training and citizen participation. [mmun](#) [_____](#) 13 Figure 12: Leading vehicle import countries to Jamaica in 2019. Road-transport decarbonisation in small island developing states hinges on import-driven fleet dynamics and the policy instruments that shape technology uptake. Using Jamaica as a case study, this paper analyses a vehicle-import microdataset and an aggregate fuel-consumption series for 2014–2023 to. Jamaica stands on the brink of a transformative shift towards electric vehicles (EVs), fuelled by a global surge in sustainable transportation and a growing local appetite for cleaner, more efficient alternatives. Yet industry leaders warn that restrictive market conditions are slowing this. three public charging stations were installed since the beginning of this year. With over 400 EVs, Barbados is one of the world's top users on a per capita basis (Forbes, December 2018). In Jamaica, for example, the policy highlights the penetration targets set out in the Electromobility Strategic Framework, with 12% of privately owned electric vehicles by 2030 and 16% of public.
