ESN Premium's deep dive into Japan continues with a look at the complexities of an evolving market underpinned by strong drivers for energy storage. "Japan is targeting a 46% reduction in greenhouse gas emissions by 2030, with a goal of 40-50% power supply from renewable energy by 2040, roughly. ing technical challenge of our time. As an effective tool in order to solve this issue, energy storage sys and abroad to reduce CO2 emis-sions. In the field of power generation, a large vol-ume of CO2 is generated from fossil fuels and the rate of thermal ower generation must be sup-pressed. Aside from Japan"s plans for wide-spread.
