

Jiang solar power subsidies

Overview

Reduced solar subsidies could add pressure on China's solar industry, where overcapacity relative to global demand has led to a drop in module prices. China's Ministry of Finance (MOF) has increased its solar energy subsidies tenfold, from 100 million yuan to 1 billion yuan (US\$137 million) for 2024. This substantial investment in solar energy will primarily support power generation in rural areas and clean energy product development in the. BEIJING, 10 February 2025 - In a move to reshape the global renewable energy landscape, China announced that it will reduce subsidies for wind and solar projects after achieving its clean energy targets six years earlier than expected. This decision, presented by the National Commission for. The production of solar panels was the most subsidised industrial sector over the period 2005-24, which saw the People's Republic of China becoming dominant across the entire solar value chain.
