

# Kathmandu electric vehicle adoption

## Overview

---

Nepal is seeing a dramatic rise in the use of electric vehicles as the government introduces tax incentives and air pollution concerns rise. While import duties for internal combustion engine vehicles remain as high as 300% or more, EVs benefit from significantly lower. The current state of EV adoption is at full swing, as about 70% of cars being sold in Nepal are electric. The constant engine rumble and air pollution from carbon emission vehicles are being replaced by quiet and carbon-free electric vehicles (EV) in the form of cars, jeeps, motorcycles, etc. With. An Electric Vehicle (EV) is a car that is powered partially or entirely on rechargeable batteries by electricity as an alternative to fossil fuels such as petrol or diesel. These targets align with Nepal's environmental.
