

# **Large-capacity integrated energy storage cabinet for power stations**

## Overview

---

Engineered with advanced battery technology and modular design, this solution provides high capacity, scalability, and efficient power management. Ideal for grid support, peak shaving, and backup power, the C&I Container Solution enhances operational efficiency and. Renon Power's C&I Container Solution offers robust, large-scale energy storage for commercial and industrial applications. Ideal for grid support, peak. In modern commercial and industrial (C&I) projects, it is a full energy asset —designed to reduce electricity costs, protect critical loads, increase PV self-consumption, support microgrids, and even earn revenue from grid balancing services like FCR. Featuring 215kWh of LiFePO4 storage and a 120kW PCS, this system is engineered for industrial parks and commercial complexes that require high-power energy. With energy ratings from 200 kWh to multiple MWh, our battery storage options are sure to fit your microgrid system needs. Talk with an Expert Smart storage. Secure energy resilience for your own organization while stabilizing the grid for everyone. Liquid cooled outdoor 215KWH 100KW lithium battery energy storage system cabinet is an energy storage device based on lithium-ion batteries, which uses lithium-ion batteries as energy storage components inside.
