

# Latest analysis chart of photovoltaic panel trend

## Overview

---

The photovoltaic panel price trend chart reveals a fascinating story of technological advancement and market dynamics. Over the past decade, solar module costs dropped 82% globally, but recent supply chain disruptions caused temporary spikes. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) - Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt. 2 TW dc • China continued to dominate the global market, representing ~60% of 2024 installs, up 52% y/y. • The IEA reported Pakistan's rapid rise to fourth place in annual global PV. IEA PVPS has released its latest Trends in Photovoltaic Applications 2025 report, revealing that the world's cumulative installed PV capacity surpassed 2 260 GW by the end of 2024, marking a 29% year-on-year increase. 25 billion in 2023 and is projected to reach USD 287. Growing demand for renewables-based clean electricity coupled with government policies.
