

# Latest news on flywheel energy storage at the Vatican solar container communication station

✓ 50KW/100KWH

✓ HIGHER POWER OUTPUT  
IN OFF-GRID MODE

✓ CONVENIENT OPERATION  
& MAINTENANCE

✓ PRE-WIRED

## Overview

---

ROME (CNS) -- Almost a year after Pope Francis set up a commission to develop a large solar-panel array on Vatican property outside of Rome, Pope Leo XIV visited the site and the Vatican Radio employees working there. The magnetically suspended flywheel energy storage system (MS-FESS) is an energy storage equipment that accomplishes the bidirectional transfer between electric energy and kinetic energy, and it is widely used as the power conversion unit in the uninterrupted power supply (UPS) system. Are flywheel. Most people would not expect the world's smallest country, with fewer than 1,000 residents, to lead the global energy conversation. In 2025, the Vatican City flipped the switch on something much bigger than its size. A full transition to solar power. Under the leadership of Salvatore Farina, a former Chief of Staff of the Italian Army and current head of the. Today's feast of the Body and Blood of Christ is a Vatican holiday, although Pope Leo will celebrate the Mass and Corpus Christi procession on Sunday when the feast is observed in Italy. He wanted to highlight the need "to make a transition to a sustainable development model that reduces greenhouse gas emissions into the atmosphere, setting the goal of climate neutrality.
